

BULBS

YOUR GARDEN WILL SHINE WITH OUR BEAUTIFUL SELECTION OF BULBS

Autumn is the time bulbs need to be planted for a spectacular *spring flowering* display. Most bulbs can be planted virtually all over Australia; however, in the warmer zones of NSW it might be necessary to *refrigerate tulip bulbs* during winter.

Many of the old-fashioned varieties of bulbs such as *Freesias*, *Jonquils* and *Daffodils* are among the world's best bulbs because they can be planted into the ground and left forever.

FERTILISING

If the bulbs are fertilised regularly during the second growing season with a complete '**BULB FOOD**', they will flower with a stunning floral arrangement and it will enhance the perfume of these glorious plants.

Bulbs can be grown in bowls using '**BULB MIX**' this will encourage sustained, healthy growth. The best fertiliser available is '**YATES BULB FOOD**' that ensures stunning flowering. Some bulb varieties are beautiful for cut flowers and vase arrangements.

CARE

Moderate watering, prune any spent flowers but do not remove leaves until they die off naturally. The period after the end of flowering is when the bulb replenishes its reserves and sets the buds for the following year's season.

At Sherringham's Nursery, we are pleased to highlight our *extensive range of spring flowering bulbs*.
